

CYBER SATURDAY

MAY
22ND

LOCATION

VIRTUAL

Introductions, Resources, Recommendations

Our Cyber Saturday event will help you to delve into the world of cybersecurity, from networking to the command line, from what you see in the browser to the back-end databases. We will provide you with an idea of specific careers in the cybersecurity field, as well as give you a long list of activities you can do on your own home computers to prepare you for those careers. We'll also be giving a few demonstrations on some basic vulnerable machines, and with our lab environment, you'll be able to follow along!

AGENDA

- 09:30am** – **10:00am** **Welcome & Check-in**
- 10:00am** – **10:30am** **Cybersecurity Speaker & Careers**
